What is DeFi?

Decentralized Finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and institutions have on money, financial products, and financial services.

How it works?

Decentralized finance uses the blockchain technology that cryptocurrencies use. A blockchain is a distributed and secured database or ledger. Applications called dApps are used to handle transactions and run the blockchain.

In the blockchain, transactions are recorded in blocks and then verified by other users. If these verifiers agree on a transaction, the block is closed and encrypted; another block is created that has information about the previous block within it.

The blocks are "chained" together through the information in each preceding block, giving it the name blockchain. Information in previous blocks cannot be changed without affecting the following blocks, so there is no way to alter a blockchain. This concept, along with other security protocols, provides the secure nature of a blockchain.

DeFi Benefits

- There are no intermediaries, so no banks or institutions overseeing your money
- There's a level of transparency, as the code is available for anyone's review
- There are open networks that transcend geographic borders
- There are many applications for users, primarily based on Ethereum

About Us

Cosmosium Finance is a brand new ecosystem that offers several unique features on DeFi world of BSC. We combined finance with art, art with derivatives, derivatives with finance and named this combination as Cosmosium Finance.

Main Features

- Simple Earning
- Auto Compounded Farms
- Index Strategies
- Call/Put Options
- Locked staking
- Liquidity Farming
- NFT Staking

Our Products

- Cosmic Farms : Cosmosium Finance DApp designed for easy use.
- Galaxies : All in one multiple token solutions.
- Satellites : Option trading with vesting & discounts.
- Clusters : Time-based staking with higher APY.
- Liquidity Farming : Earn \$BUZZ while providing liquidity.

BUZZ Token

\$BUZZ is the native token of our ecosystem. Further, improvements and developments will be based on the \$BUZZ.

- Token Name: **BUZZ**
- Official Token Symbol: **\$BUZZ** (will be used as token for liquidity mining)
- Chain: **Binance Smart Chain**
- Total Supply: **500.000.000 \$BUZZ**

Cosmic Farms

Cosmosium Finance offers staking farms which users can stake BUZZ, BUZZ LPs and Index Tokens (Galaxies) to earn BUZZ.

Also after the release of farms. Cosmosium Finance will announce Cosmonaut NFTs which users can also stake on Cosmosium Finance to earn multiple tokens like DAI, WBNB and BUZZ.

Galaxies

Galaxies is a unique technique on Binance Smart Chain DeFi world. It's similar to the Index system. Users can deploy their indexes with the amount of token ratios they provide. Other users can join these indexes by minting the index tokens by providing the tokens with the same ratios.

Galaxies will start with a Beta stage at the beginning. We will provide 5 indexes by Cosmonauts of Cosmosium Finance. After the beta phase, users will be able to deploy their indexes.

Clusters

Cosmosium Finance offers clusters for users. You can select a locking period for your staking. It's not able to withdraw & harvest until this period ends. Higher locking period benefits with higher APYs.

3 Locked Staking Periods ↓

Short-term → 7 days locking

Mid-term → 30 days locking

Long-term → 90 days locking

Satellites

Satellites are the unique token offering system for our users. It is similar to Call/Put options trading. Users can call BUZZ tokens with discounted prices & a vesting period. Also, they can put BUZZ tokens for a higher price with a vesting period.

The amount on both sides of the satellite will equalize each other. Discount & vesting ratio will be calculated dynamically.

\$BUZZ Allocation

	Initial Unlock	Vesting Schedule
Public Sale	%100	-
Liquidity Mining	N/A	-
Treasury	%5	%40 in 6 months linear unlocking in next 6 months
Team, Advisors & Partnerships	%0	3 months lock, linear unlocking in next 9 months
DEX Liquidity	%50	%40 in 6 months linear unlocking in next 12 months
Airdrops	%100	-
